

PRODUCT SPECIFICATION SHEET

MARINE SECURITY, MASTERED.

PRODUCT OVERVIEW

Triton lock is a next-generation locking solution engineered for the unique demands of marine environments. Designed specifically for doors and windows on boats and marine vessels, Tritan Lock delivers uncompromising strength and reliability to keep your vessel secure in all conditions.

Whether you're upgrading your vessel's security or outfitting a new build, Tritan Lock sets the standard for strength, innovation, and peace of mind on the water.

KEY FEATURES

- **Marine-Grade Durability:** Built to withstand harsh saltwater environments and extreme weather.
- **High-Security Design:** Provides superior protection for marine doors and windows.
- **Future-Ready Technology:** Upcoming models will feature advanced options such as Bluetooth connectivity, fingerprint scanning, and facial recognition for seamless, modern security.
